, Gaza, 97000

SUMMARY

I am a website designer and developer with a high level of accuracy and distinctive skills. I have at least 3 years of experience in web-site design and programming, which I gained through working with a number of companies in the field of website programming design using appropriate technologies for the labor market such as: PHP, Laravel Framework, ajax, Front End (html, CSS, bootstrap, JQuery, JavaScript), MySQL.

I accomplished several projects, including electronic stores, a news site, educational sites, consulting sites with admin pages, as well as in several languages.
